

## **Project Director Global Manufacturer**

### **Ability to integrate into the client company**

Engaged by this global photocopier manufacturer to assist in driving improvements in their pan-European inter-plant inventory management and spare parts distribution strategy. He was able to forge effective and efficient working relationships with the client, in both the UK and the Netherlands, driving data collection and analysis

### **Impact on the business / bottom line**

The project(s) contributed significantly towards global \$100mio p.a. total savings which were predicated on a range of contributor strategies, of which European inventory management was seen as a key contributor.

### **Overall contribution / achievement of objectives**

Key player in directing the gathering of European wide information, organising and analysing this and producing revised strategies for both inter-plant goods movements and spare parts distribution.

### **Working style**

Able to give the right mixture of drive and encouragement to secure data in a timely manner as well as extracting results. Through knowing when to encourage contributions and where to add his own inputs an all encompassing, consensus driven strategy was built.

### **Leadership / people management skills**

Led a cross functional effort in working towards a best practice solution for Europe.

### **Any other comments about the interim manager**

Able to leave the client with a structured programme of developments to be completed to achieve the planned outcomes.
